

# Key Terms and Conditions for Referring Clinicians

1. Our online referral platform (the “Referral Portal”) is designed to enable healthcare providers to refer patients to skannr.com for scheduling CT, MRI, X-Ray, or Ultrasound procedures through a CQC-accredited diagnostic imaging provider. These referrals can be made without the need for a prior specialist IR(ME)R Referral.
2. After a referral is submitted through the Referral Portal, patients are sent an auto-generated URL that takes them to a pre-filled order form on skannr.com. They can then select their preferred date, time, and location for the procedure, complete a safety questionnaire, and finalize their payment.
3. Every referred booking (“Referred Booking”) is reviewed by a skannr.com clinician. For procedures that involve radiation (like X-Rays and CT scans), the booking is assessed by a qualified IR(ME)R Referrer. The IR(ME)R Referrer or clinician may cancel or modify the Referred Booking if they believe the procedure is not appropriate or if another procedure would be more suitable.
4. The radiology report and scan images (the “Results”) for each procedure will be delivered to you digitally via the Referral Portal. If the imaging center requires a different delivery method (such as a CD-ROM), this will be arranged and communicated to you. You agree to process these Results in accordance with UK data protection laws and all other applicable legal and professional standards.
5. You agree to use the Referral Portal strictly for the purpose of making and managing patient referrals. If you discover any issues or have concerns after submitting a referral, you agree to inform skannr.com and the patient without delay.
